

# SOFTWARE DEVELOPMENT, BASIC CERTIFICATE

College(s): DA, HW, KK, MX, OH, TR, WR

Program Code: 0442

In an increasingly digital world, software development is key to the technology we use in our daily lives. There is now a growing need for software developers to create new mobile applications and software services in a variety of businesses and fields. City Colleges' Software Development program teaches students several in-demand programming languages, including Python, C++, Java and JavaScript. Through the courses, students will learn the whole life cycle of software and be ready to meet employer demands.

The Basic Certificate provides an opportunity for students to learn industry-standards through different programming languages including HTML 5 and CSS 3, Python, C++ or Java, and SQL. Students will acquire hands-on experience that develop skills using the Software Development Life Cycle (SDLC) in the analysis, design, implementation, and maintenance of software applications with those programming languages.
